Level 2

### How do the birds use their wings to fly? (Book page 13)

- <00:00> This bird is moving its wings up and down.  
The air above the wings moves quickly.  
The air under the wings moves slowly. This helps the bird to fly up.
- <00:00> This bird enjoys flying.  
The air from the wings goes behind the bird. This helps the bird to fly forward.
- <00:00> This bird is very clever. It is moving its wings, but its head does not move.
- <00:00> This bird is not moving its wings up and down. It is gliding.

### What does the pilot see when they fly a plane? (Book page 21)

- <00:00> This pilot is waiting to fly.
- <00:00> The pilot starts the jet engines.
- <00:00> The plane's engines make it move forward. Its wings take it up into the air.
- <00:00> Now the plane is flying.
